

Junior Product Manager (m/w/d)

PROGEN is driven by a mission to support scientists in making new scientific discoveries and groundbreaking research within the life sciences and gene therapy.

We are looking for an enthusiastic Junior Product Manager with strong organizational skills to manage parts of our life science and gene therapy tools portfolio and join our highly motivated Product Management team.

Your role:

- Research markets, determine customers' needs, and identify opportunities for growth
- Provide input for product improvements & development
- Assist in the development of pricing strategies and production forecasts
- Draft and update product information, datasheets, user manuals, etc.
- Prepare and deliver product trainings and presentations, assist customers with scientific queries
- Act as coordinator for cross-functional teams - R&D, QM/QC, Marketing, Sales, Scientific Support, and Production
- Proactively identify, prioritize, and drive the resolution of issues, tasks, and projects, ensuring timely progress and clear ownership
- Very occasional travel to conferences required

Your profile:

- A master's or bachelor's degree in life sciences or BTA and equivalent work experience
- Experience in standard lab techniques with a focus on molecular, cell biological, or biochemical analyses
- An open, communicative, networking personality
- An ability to manage multiple priorities with a problem-solving attitude
- A profound interest in and an understanding of customer behavior
- A demonstrated ability to interpret market data and to offer insight and recommendations for business opportunities
- Solid computer & data analysis skills
- Very good written and spoken English (level C1) and German (level B2) skills (English for customer communication; German for internal co-ordination)

Your benefits:

- **Flexible Working** - Technology has made it possible to be flexible. We understand that you have families and external commitments. We support that.
- **Travel** - All employees have the option to take advantage of a heavily subsidized Deutschland-Ticket, or they can take advantage of our bike scheme (or both!).
- **Training** - You want to learn. We want that too. We will support you and your professional development with training best suited to your learning.
- **Team Lunch** - At our monthly team lunch, everyone gets together to enjoy food from a local restaurant, sponsored by PROGEN.
- **Support** - We are a team, and we are here to support you. We do not hire machines. It is our people who make the team so great.

Sounds good so far?

Then send your application and CV via email (personal-pm@progen.com) directly to Dr. Dana Holzinger, Head of Product Management, and tell us your start date and salary expectations. We are looking forward to your application!

About us

PROGEN was founded in 1983 in Heidelberg, Germany, and today is a global biotech company working with partners in academia, biotech, and pharma. It is our underlying mission to help progress new therapies safely, quickly, and affordably, so together we can provide solutions to people suffering from poor health and affected by disease every day.

PROGEN is made up of a team of experts from AAV and life sciences field and is partnered with gene therapy experts worldwide. We are more than just a manufacturer of antibodies, proteins, and ELISA kits. We strive to understand what scientists need, so we can create solutions and ultimately deliver high-quality antibody and exclusive AAV products, which solve research challenges within academia, biotech, and pharma, and ensure PROGEN can continue to be a trusted and reliable partner.
